

SYSTEM DESIGN (UI): AI based Career Guidance System

for designing the UI design of a AI based career guidance platform. The design process began with hand-drawn sketches and layout planning, followed by digital refinement into a modular dashboard interface. Multiple web platforms were analyzed to gather design inspiration and best practices, which were incorporated to enhance usability and visual clarity.

1. Overview

The Career Support Dashboard is a user-friendly module designed to assist individuals in exploring career opportunities, improving professional profiles, and making informed career decisions. It provides four key services: CV/Resume Help, Career Testing, Job Search, and Career Advice.

2. Module Components

2.1 CV / Resume Help

This feature allows users to create and improve professional resumes with ease.

Functionality:

- Guides users in building structured resumes
- Provides templates for different job roles
- Helps improve formatting and content quality

Purpose:

To ensure users can present their skills and experience in a professional and attractive format.

2.2 Career Testing

This feature helps users identify suitable career paths based on their skills and interests.

Functionality:

- Interactive skill-based assessments
- Personality and aptitude tests
- AI-based career recommendations

Purpose:

To guide users toward career options that match their strengths and interests.

2.3 Job Search

This feature enables users to explore and apply for job opportunities.

Functionality:

- Search jobs by category, location, or skills
- View detailed job descriptions
- Browse available opportunities in real time

Purpose:

To simplify the job-hunting process and connect users with relevant employment opportunities

2.4 Career Advice

This feature provides expert guidance and professional career tips.

Functionality:

- Access to career articles and guidance materials
- Tips for interviews and professional growth
- Recommendations from career experts or AI assistants

Purpose:

To support users in making informed decisions and improving career development strategies.

3. Overall System Goal

The Career Support Dashboard aims to provide an integrated platform where users can:

- Build strong resumes
- Discover suitable career paths
- Find relevant job opportunities
- Receive expert career guidance

As a final blueprint we costmise the system ui as below;
